**Claim 25:**

In the last line, after "displacement" and before ".", insert wherein the connectors along the short edges of the floorboard are adapted for locking together the floorboard and a similar floorboard only in a horizontal direction, perpendicular to a vertical plane extending between upper edges of the floorboards when the floorboards are locked together, such short edge connectors include: a first short edge having a strip extending from an underside of the floorboard and a locking member projecting upwardly from the strip, wherein the strip and the locking member extend beyond the vertical plane; and a second short edge having a groove on the underside arranged parallel to the second short edge, wherein no part of the second short edge extends beyond the vertical plane so as to enable the second short edge to be folded down vertically onto the strip of the first short edge so that the locking member fits into the underside groove to effect horizontal locking

**Claim 26:**

Replace the contents of claim 26 with the following:

The method as claimed in claim 25, wherein the floorboards are laminate and have a length and a width that does not exceed 80 and 10 cm. respectively.
